Kaggle

Data Analyst and Business Intelligence professional with 5+ years of experience transforming complex operational, commercial, financial, and supply-chain data into reliable dashboards, KPI reports, forecasting models, and actionable management insights. Experienced across healthcare supply chain and e-commerce environments, with strong hands-on expertise in Power BI, SQL, Python, Excel, data validation, statistical analysis, forecasting, and automated reporting. Currently leading planning and analytics initiatives at **Bait Al Batterjee Hospitals Management L.L.C. (Saudi German Health)** across **3 hospitals and 7 clinics in the UAE**, supporting **AED 250M+ in annual medical and pharmaceutical spend**. Proven ability to integrate data from multiple systems, improve reporting accuracy, implement data-quality controls, and present insights to senior stakeholders. Holds an Associate Degree in Computer Science from the University of the People and is continuing toward a Bachelor's Degree in Computer Science.

PROFESSIONAL EXPERIENCE

UAE Group Supply Chain Planner and Analyst <i>Bait Al Batterjee Hospitals Management L.L.C. (Saudi German Health)</i>	2025/05 – present Dubai, United Arab Emirates
- Lead planning, reporting, and business analytics across 3 hospitals and 7 clinics in the UAE, supporting AED 250M+ in annual medical and pharmaceutical spend. - Develop executive Power BI dashboards integrating COGS, revenue, consumables, inventory health, vendor spend, contract compliance, and operational exception analysis. - Design and maintain KPI reports for month-to-date, month-on-month, and year-to-date performance, including DIO, COGS trends, price variance, vendor compliance, and operational performance. - Consolidate, validate, and analyse data from patient charges, consumptions, GRNs, item-price records, contracts, and inventory systems using SQL and Power BI data models. - Implement data-quality controls to identify missing classifications, inaccurate unit conversions, cost mismatches, and reconciliation exceptions before management reporting. - Develop automated Python price-variance reports and financial reconciliation analyses to quantify cost changes and investigate revenue, COGS, accrual, and vendor-adjustment discrepancies. - Build internal reporting portals using Python, Streamlit, SQL indexing, and Docker, improving access to timely and validated information. - Develop and maintain a centralised demand-planning portal using Python, Streamlit, and SQL, integrating consumption, inventory, purchasing, and forecast data for replenishment planning and stock-risk monitoring. - Prepare periodic management reports, data summaries, and presentations, ensuring accurate, consistent, confidential, and decision-ready information for senior stakeholders.	
Data Analyst <i>Digital Business Systems (DBS)- outsourced to DMSCO.</i>	2024/06 – 2025/04 Cairo, Egypt
- Delivered e-commerce and commercial analytics solutions, including sales performance dashboards, forecasting models, customer-behaviour analysis, loyalty-program reporting, and automated Excel reports. - Developed sales forecasting and performance-tracking solutions using Python, SQL, Pandas, regression, and time-series analysis.	

- Connected SQL Server data through SQLAlchemy to automate extraction, cleaning, validation, and reporting workflows.
- Created Month-to-Date performance reports comparing actual results against targets, enabling timely management intervention.
- Generated automated multi-sheet Excel reports with daily, store-level, and performance insights for operational stakeholders.
- Built interactive dashboards and loyalty-program reports to analyse customer engagement, redemption behaviour, and retention trends.
- Analysed large-scale Arabic and English SMS data using spaCy and NLTK, supporting communication performance analysis and anonymised insights.
- Applied K-Nearest Neighbors classification to categorise communication records and identify actionable patterns.

Demand Planner

2021/04 – 2024/06

El-Ezaby Chain Pharmacies

Cairo, Egypt

- Developed inventory forecasting models using ARIMA, SARIMA, SARIMAX, and Prophet to improve demand planning and stock availability.
- Built Power BI dashboards and automated reports for inventory management, demand trends, and planning performance.
- Conducted Python-based market research and sentiment analysis that supported a product launch with 30% higher customer demand.
- Delivered data-driven recommendations for replenishment, stock optimisation, and operational efficiency.

FEATURED ANALYTICS & ENGINEERING PROJECTS

Integrated Hospital Performance Dashboard | Power BI, SQL, Python, Streamlit

Built an integrated healthcare performance dashboard combining operational, financial, and supply-chain data. Delivered executive visibility into COGS, revenue, inventory health, vendor spend, contract compliance, and drill-through exception analysis to support evidence-based management decisions.

Demand Planning Portal | Python, Streamlit, SQL, Forecasting

Developed a centralised demand-planning portal that combines historical consumption, inventory, purchase, and forecast data into a single planning environment. The portal supports demand forecasting, replenishment planning, stock-risk monitoring, performance tracking, and data-driven decision-making across multiple hospitals and clinics.

Digital PR Tracking Portal | Flask, Python, Web Automation

Developed a Flask-based web application to fully automate the end-to-end Purchase Request (PR) workflow. The system captures incoming PRs from the digital website, triggers automated email notifications to department managers for purchaser assignment, and tracks subsequent Purchase Order (PO) status updates continuously.

NOI, Credit Note and GRN Compliance Engine (Benefits Portal) | Flask, SQL, Analytics

Developed a validation and reporting portal that compares supplier contractual terms, free-of-charge items, bonuses, and credit notes against Goods Received Notes. Automatically identifies non-compliance cases and supports supplier scorecards, financial controls, and S&OP reporting.

EDUCATION

University of the People

2024/11 – present

Bachelor's Degree

Bachelor's degree in Computer Science

University of the People

2024/11 – 2026/08

Associate Degree

Associate Degree in Computer Science

CERTIFICATES

- ALX DATA SCIENCE
🔗
- Analyzing and Visualizing Data with Microsoft Excel at Microsoft
- IBM Data Science Professional Certificate
- Analyzing and Visualizing Data with Microsoft Power BI at Microsoft
- AI augmented professional development skills in digital age at Alx Africa
- CS50 SQL - CS50's Introduction to Databases with SQL at Harvard University

SKILLS

Business Intelligence & Reporting — Advanced
Power BI, Excel, KPI Design, Dashboard Development, Data Visualization, Management Reporting, Trend Analysis, Performance Measurement

Data Analysis & Data Management — Advanced
SQL, Python, Pandas, SQLAlchemy, Statistical Analysis, Forecasting, Data Cleaning, Data Validation, Data Integration, Data Quality Controls, Data Governance, Reporting Standards, Data Confidentiality, Automated Reporting

Forecasting & Analytical Methods — Proficient
ARIMA, SARIMA, SARIMAX, Prophet, Regression, Inventory Forecasting, Demand Planning, ABC/XYZ/FMR Analysis

Programming, Automation & Pipelines — Advanced
Python, JavaScript, PHP, Flask, Django, Streamlit, VBA, Web Scraping, Workflow Automation, ETL/ELT, Data Pipelines, API Integration, Docker, Linux

Databases & Version Control — Advanced
Microsoft SQL Server, PostgreSQL, MySQL, Database Indexing, GitHub

Industry Analytics — Advanced
Healthcare Operations, Supply Chain Analytics, E-commerce Analytics, Financial Reconciliation, Inventory Analytics, Vendor Performance, Procurement Analytics

LANGUAGES

Arabic
Native

English
Proficient
